The Musical Association at Arbovale last week was a success notwithstanding the rainy weather. The local attendance was good, but not as many from a distance as had been anticipated. Much interest was shown in the cause of sacred music and without doubt much was done towards its advancement. We were unable to learn who was elected chairman for the ensuing term.

Col. John Alexander is preparing to build a large crib and buck dam in Knapps Creek at the Reunion Ground to protect East Marlinton from high water and change the creek back to its original bed at the foot of the hill away from which it has been gradually working for years. A channel will also be cut through the McClintic bottom. This will remove the inconvenience of back water, during a flood, by letting the creek empty into the river farther down stream and not at right angle as is now the case. These improvements will remove the only objection that can be made to Marlinton as a town site.

S. B. Wallace and Dr. Curry, who constitute the firm of S. B. Wallace & Co., who succeed Harry R. Echols as proprietor of the Marlinton Drug Store, are here this week taking inventory of the stock, which is worth between six and eight thousand dollars. They will keep the stock of drugs, physicians' supplies, etc., up to the high standard maintained by the retiring owners, and it will continue to be one of the leading drug stores of this part of the State. Their drug list, notice of whom was made last week, has arrived.

ATTEMPTS SUICIDE

GEORGE GOLFORD SHOOT HIMSELF.

In a Temporary Fit of Insanity He Tried to Kill his Sister in Law, and then puts a Bullet in His Own Head.

George Galford, a woodsman, shot himself in the head at Cass Tuesday morning with intent to take his life. He had been at Durbin the past week on a protracted drunk, and coming to Cass on Monday's train, got a horse and rode to his brother's, Charles Galford, above Cass. Mrs. Galford answered the call, and saying he had come there to kill her, he shot several times at her.

The woman quickly got under cover but not before a bullet had passed through her bonnet. Galford seemed to realize in full measure what he had done and turned the gun, a 32 calibre revolver, upon himself, inflicting a very dangerous if not fatal wound just above the right eye, the ball ranging back and is supposed to be lodged against the skull.

Dr. Randolph rendered surgical aid, but could not locate the bullet. He took the wounded man to the Hinton Hospital where the X-Rays will be used to locate the ball. Up to Tuesday afternoon Galford had not lost consciousness although his brains were oozing from the wound.

Galford is about thirty years old, a son of Dallas Galford, and has been married but is not living with his wife at this time. He was employed as a woodsman by the West Virginia Spence Lumber Company. No motive whatever can be found for his desire to murder his sister-in-law. It can only be ascribed to a fit of temporary insanity brought on by the use of pig's ear liquor.

Free cooking books for the asking at the Pocahontas Bargain House.

Rev. Asa D. Watkins will preach at Cass the first Sunday of July at 11; Boyer at 4 o'clock.

It is currently reported that trains will make the through trip over the Coal and Iron Railway next week.

We would like to see an additional passenger train on the Greenbrier Division and we have reason to hope that it will be put on shortly.

T. S. Neel will qualify as administrator of N. J. Brown. H. C. Browning a wholesale merchant of Washington was at Mill Point this week. He is a cousin of the late Mr. Brown and represents the heirs of the estate. Mr. Brown left an estate worth from fifteen to twenty thousand dollars in realty and personality.

BEES MAKE MONEY

If Given a Fair Chance to Make Honey.

And the Ware Improved Hive is just what the bees need. In it they are in the position to given the attention which is so important to their well being.

This hive have all the conveniences and is very simple in design. There is not a corner in which a moth can hide, but that can be reached and constant handling of bees makes them tame and less apt to sting than in the old time gum.

By the use of the Ware Hive swarming can be regulated to a large extent, and the loss by starvation can be prevented all together by a little care and at small expense.

This has been our busiest year so far, and as the season has not fairly commenced we expect a large rush, but we are prepared for it and hope to be able to furnish hives and supplies promptly.

Write us for particulars about the best hive on the market.
